SUMMARY

MCA graduate with two AI/ML internships delivering production software to clients. Built and deployed a 57-endpoint AI resume platform on AWS, and shipped a multilingual speech translation product with a three-person team. Strengths in Python, FastAPI, React/Next.js, retrieval-augmented generation, NLP and cloud deployment. Seeking Software Developer / AI-ML Engineer roles.

TECHNICAL SKILLS

Languages: Python, Java, JavaScript, TypeScript, C++, SQL, HTML5, CSS3

Frontend: React, Next.js, Tailwind CSS, Bootstrap, Chart.js, Zustand

Backend: FastAPI, Flask, Node.js, Express.js, Django

Databases: MySQL, PostgreSQL, MongoDB, SQLite, Oracle

AI/ML: scikit-learn, FAISS, BM25, Sentence Transformers, Cross-Encoder Re-ranking, OpenAI Whisper, Google Gemini, NLI (DeBERTa), Random Forest, K-Means, LLM Integration (Ollama, AWS Bedrock), RAG

Cloud/DevOps: AWS (EC2, S3, Bedrock), Docker, Git, GitHub, CI/CD, Postman, Alembic

Concepts: REST APIs, Microservices, Agile/Scrum, OOP, DSA, JWT Auth, Server-Sent Events, Rate Limiting, Semantic Search, Vector Databases

PROFESSIONAL EXPERIENCE

AI/ML Intern

DigitalTransols AI Pvt Ltd, Bengaluru | Apr 2026 - Aug 2026

- Built and delivered ResumelQ, an AI resume optimization platform, end to end from architecture through AWS deployment, with full source code handover
- Designed a FastAPI backend with 57 REST endpoints across 11 route modules covering analysis, optimization, generation, tracking, export and analytics
- Developed a five-layer semantic skill matcher (exact, alias, substring, embedding, ontology) using FAISS with 200+ skill alias mappings
- Built four scoring engines: composite fit, experience progression, BM25 keyword density and bullet presentation quality
- Integrated AWS Bedrock (Claude Sonnet 4.5) for STAR-format bullet rewriting, cover letters and interview preparation
- Reduced operating cost by keeping all scoring local via FAISS, reserving paid LLM calls for generation only, with per-token spend tracked
- Developed the Next.js 16 / React 19 frontend with resume builder, live ATS scoring and PDF/DOCX export across four templates
- Implemented JWT auth with bcrypt, per-user data isolation, rate limiting, Alembic migrations and Docker Compose deployment

Gen AI Intern

Guruvidhya IT Services Pvt Ltd, Bengaluru | Sep 2025 - Nov 2025

- Developed Dubify AI in a team of three: a video and audio dubbing platform supporting 22+ Indian languages, built with Python and Flask
- Integrated OpenAI Whisper for transcription and Google Gemini for translation and in-app chat assistance
- Built a gTTS and FFmpeg pipeline for dubbed audio generation with batch uploads and live microphone translation
- Implemented SRT subtitle export preserving source timestamps, with side-by-side review before dubbing
- Built user authentication, project-history dashboard (Flask-Login, SQLAlchemy) and Stripe Pro membership access control

PROJECTS

SecureHall-RAG (MCA Thesis) | FastAPI, Next.js, FAISS, BM25, Ollama, NLI, Docker

- Enterprise RAG system for corporate policy document Q&A with hallucination mitigation and prompt injection defence
- Hybrid retrieval (FAISS dense + BM25 sparse) with cross-encoder re-ranking; NLI faithfulness scoring with four-tier soft redaction
- Prompt injection defence combining pattern library and embedding-similarity detector, raising measured block rate from 54.8% to 61.3%
- RAPTOR hierarchical summaries, multi-hop query decomposition, Reciprocal Rank Fusion query expansion, semantic caching and SSE streaming

IoT Air Quality Monitoring System | Python, Flask, scikit-learn, Chart.js, ESP32

- Real-time air quality monitoring streaming MQ-135 and DHT11 sensor data via ESP32
- Random Forest model on 15,000+ samples, 95%+ accuracy under 5-fold cross-validation, 24-hour AQI forecasting
- Threshold alerting via Twilio SMS/WhatsApp; synthetic data fallback keeps forecasts demonstrable without hardware

EDUCATION

Master of Computer Applications (MCA) | Dr. Ambedkar Institute of Technology, Bangalore | 2024 - 2026 | CGPA 8.32/10

Bachelor of Computer Applications (BCA) | AES National Degree College, Gauribidanur | 2021 - 2024 | CGPA 9.01/10

ADDITIONAL

Languages: English, Hindi, Kannada

Interests: Full Stack Development, Cloud Computing, AI/ML, Generative AI, Information Retrieval
