SUMMARY

MCA graduate and AI Engineer with hands-on Python experience across the ML and Generative AI lifecycle — data cleaning and EDA (Pandas/NumPy), model development with scikit-learn (supervised and unsupervised), and evaluation using Accuracy, Precision, Recall and F1-Score. Practical, production experience integrating LLM APIs (AWS Bedrock/Claude, Google Gemini), prompt engineering, RAG pipelines, embeddings and vector databases (FAISS). Comfortable with SQL, Git/GitHub, clean OOP code, and using AI tools daily to move faster.

TECHNICAL SKILLS

Languages: Python, Java, SQL, JavaScript, TypeScript, C++, HTML5, CSS3

ML & Data: Pandas, NumPy, scikit-learn, EDA, data cleaning & preprocessing, feature engineering, supervised & unsupervised learning (Random Forest, K-Means), model evaluation (Accuracy, Precision, Recall, F1-Score, cross-validation)

Generative AI / LLMs: AWS Bedrock (Claude), Ollama, OpenAI Whisper, Google Gemini, RAG, prompt engineering, embeddings, vector databases (FAISS), Sentence Transformers, agentic pipelines (multi-hop query decomposition)

Backend & APIs: FastAPI, Flask, REST APIs, third-party API integration, Node.js, Express.js, JWT Auth

Databases: PostgreSQL, MySQL, MongoDB, SQLite, Oracle — schema design, SQL queries & joins

Cloud & DevOps: AWS (EC2, S3, Bedrock), Docker, Git, GitHub, CI/CD pipelines, Postman, Linux command line

Frontend: React, Next.js, TypeScript, Tailwind CSS, Chart.js

Concepts: OOP, DSA, Clean Code, Microservices, Agile/Scrum, Semantic Search, Server-Sent Events

PROFESSIONAL EXPERIENCE

AI/ML Intern

Apr 2026 – Aug 2026

DigitalTransols AI Pvt Ltd, Bengaluru

- Built and deployed ResumeIQ end to end — database schema design, a FastAPI backend with 57 REST endpoints across 11 route modules, and a Next.js/React frontend — with full source code handover and AWS deployment.
- Designed a five-layer semantic skill-matching engine using FAISS embeddings and vector search across 200+ skill mappings, applying clean OOP and modular design principles throughout.
- Integrated AWS Bedrock (Claude Sonnet 4.5) as an LLM for generation tasks (STAR-format rewriting, cover letters) with prompt engineering, while keeping cost-sensitive scoring logic running locally in Python (FAISS/BM25) instead of routing every request through paid LLM calls.
- Set up Alembic-based database migrations, SQL schema design, and JWT authentication, following code review and version-control practices in Git/GitHub.
- Used Postman for API testing and containerized the full stack with Docker Compose for deployment to AWS EC2.

Gen AI Intern

Sep 2025 – Nov 2025

Guruvidhya IT Services Pvt Ltd, Bengaluru

- Developed Dubify AI in a three-person team — a Python/Flask platform integrating third-party LLM/AI APIs (OpenAI Whisper, Google Gemini) for multilingual transcription and translation across 22+ languages.
- Built backend data pipelines (audio/text processing) and a project-history dashboard using Flask-Login and SQLAlchemy, with Git-based collaboration across the team.
- Implemented authentication and access control, and used AI coding assistants to speed up debugging and documentation during development.

PROJECTS

SecureHall-RAG (MCA Thesis) | Python, FastAPI, FAISS, BM25, Ollama, NLI

- Built an enterprise RAG system for policy-document Q&A with hallucination mitigation and prompt-injection defence.
- Implemented hybrid retrieval (FAISS dense + BM25 sparse) with cross-encoder re-ranking, agentic multi-hop query decomposition, and NLI-based (DeBERTa) faithfulness scoring — raising the measured prompt-injection block rate from 54.8% to 61.3%.

IoT Air Quality Monitoring System | Python, Pandas, NumPy, scikit-learn, Flask

- Cleaned and preprocessed 15,000+ sensor readings using Pandas/NumPy, performed exploratory data analysis, and engineered features for a Random Forest forecasting model.
- Evaluated the model using Accuracy, Precision, Recall and F1-Score under 5-fold cross-validation, reaching 95%+ accuracy; built a real-time Flask + Chart.js dashboard with Twilio-based threshold alerting.

EDUCATION

Master of Computer Applications (MCA)

2024 – 2026

Dr. Ambedkar Institute of Technology, Bangalore | CGPA 8.63/10

Bachelor of Computer Applications (BCA)

2021 – 2024

AES National Degree College, Gauribidanur | CGPA 9.01/10

ADDITIONAL

Languages Spoken: English, Hindi, Kannada | **Interests:** AI/ML, Generative AI, Data Science, Full Stack Development, Information Retrieval
